The 28 Top Spine Surgeons in America
By OTW Staff

Who are the best surgeons, clinicians, investigators and administrators in spine? We've seen the lists—including in the magazine on the airlines that are often our second homes. But how reliable are these lists? Is this like the Who's Who racket where, for a mere couple of hundred dollars, you can be listed?

We took a different approach. Over the years, we have compiled a fairly comprehensive list of contacts in orthopedics. Who better to pick the top spine physicians than their own colleagues? So we decided to ask leading spine surgeons to select the best of their peers.

It didn't matter to us if we came up with five names or fifty. All we asked was, who among your peers do you think is at the top of your profession? Time and again the same names rose to the top. And we compiled a list of those people who were mentioned most consistently.

Here is that list. It isn't the be-all and end-all list—but a list of who are arguably the finest spine physicians, teachers, investigators or administrators in the country. This information was obtained via a telephone survey of thought leaders in the field. The information in quotes is what we heard about these surgeons.

Tell us what you think.

In alphabetical order, then, here are the top 28 spine physicians in America.

Todd Albert, M.D.
Dr. Albert is president of the Rothman Institute in Philadelphia and chair of the Department of Orthopaedic Surgery at Thomas Jefferson University. “An incredibly talented surgeon and administrator.”

Howard An, M.D.
Dr. An is the Morton International Endowed Chair Professor of Orthopaedic Surgery, as well as the director of the Division of Spine Surgery at Midwest Orthopaedics at Rush in Chicago. “A really wonderful surgeon who is very compassionate.”

Scott D. Boden, M.D.
Dr. Boden is professor of orthopedic surgery and director of the Emory
Orthopaedics and Spine Center. “An accomplished researcher and superior clinician.”

**Christopher Bono, M.D.**
Dr. Bono is chief of spine at Brigham and Women’s Hospital and assistant professor at Harvard Medical School. “A great thinker and clinical researcher; an honest man.”

**Darryl Brodke, M.D.**
Dr. Brodke is professor of Spinal Disorders and director of the Spine Center at the University of Utah School of Medicine. “A great biomechanical researcher and administrator.”

**Jens Chapman, M.D.**
Dr. Chapman is chair of the Department of Orthopaedic Surgery at University of Washington in Seattle. He is also director of the Spine Service. “A consummate traumatologist and spine surgeon.”

**Mark Dekutoski, M.D.**
Dr. Dekutoski is associate professor of orthopedics at Mayo Clinic in Minnesota. “A great clinician and leader who is very aware of the literature.”

**Frank Eismont, M.D.**
Dr. Eismont is chairman and chief of the Department of Orthopaedic Surgery at Jackson Memorial Hospital in Miami. “Known for his terrific trauma and cervical work.”

**Sanford Emery, M.D., M.B.A.**
Dr. Emery is professor and chair at the Department of Orthopaedic Surgery at the West Virginia University. “An amazing surgeon, leader, and clinical researcher.”

**Steven Garfin, M.D.**
Dr. Garfin is chair of the Department of Orthopaedic Surgery at UC San Diego; he is also chief of the UC San Diego Spine Program. “Thoughtful, incredibly diligent, and a passionate teacher.”
