Offering the most experienced, comprehensive, and holistic approach to minimally invasive hip and total knee replacement, this is Dr. Richard Berger and his dedicated staff.

Dr. Berger pioneered minimally invasive hip and knee replacements and performs over 1,000 of these procedures each year. Unlike anywhere else in the country, most patients have so little discomfort they are able to walk unaided the same day of surgery. This allows patients to leave the hospital the day of surgery, so they may recover in the comfort of their own home.

Whether patients are from the Chicagoland area, travel from around the country or internationally,

Dr. Berger and his team are able to provide a seamless and pleasant surgical experience.

Dr. Berger's patients benefit from the latest technological advancements, such as gender-specific implants, the newest bearing surfaces, modular implants, bone-conserving procedures, and advanced anesthesia techniques.

An educated patient is a happy and healthy patient; Dr. Berger's staff provides extensive pre-operative education so that every patient knows exactly what to expect every step of the way. Dr. Berger and his team are devoted to treating the whole patient, tailoring the surgical experience to each individual, down to the smallest of details.

Throughout the surgical experience, Dr. Berger and his team are responsive and accessible 24 hours a day, seven days a week. The dedicated staff includes three administrative assistants, a medical assistant, a patient liaison, a physical therapist, two insurance coordinators, a home services coordinator, three registered nurses, and one surgeon.

Standing, from left: Alison Marczewski (insurance coordinator); Eileen Serafin (discharge planner); Andrea Sanchez (administrative assistant); Joely Figueroa (medical assistant); Tara Kennon (insurance coordinator); Sheila Sanders (nurse); Richard Berger, MD; Jenny Russell (nurse); Betsy Thill (nurse); Melissa Layher (therapist); Arisha Zingarelli (administrative assistant); Heather Reed (patient liaison).
